I am a passionate web designer and full-stack developer with lots of business and project management experience. I have designed interfaces and developed web applications as well as managed web development projects and run my own design studio for over ten years. In that same time, I also have run a successful medical service company, worked there as the technical manager, and lead a team of endoscopy technicians for just short of five years.

I understand business, and I strive to design technical solutions and strategies that work well for short- and long-term business objectives. I am also a web-usability evangelist and an excellent communicator. I like to work in an agile environment, and I take your or your client's business as if it is my own.

## Skills

- Database: mongoDB, MySQL, MSSQL, PostgreSQL
- Back end: Node, Express, ASP.NET, Python, Perl
- Front end: Angular, React, TypeScript, JavaScript
- Markup and style: HTML, CSS, SASS, EJS, PUG
- Analytics: Google Analytics, Tag Manager, AdWords
- Hosting and domain server: Plesk, cPanel, AWS
- Graphics: all Adobe and Omnigroup applications
- Typography: Adobe InDesign, QuarkXpress, LaTeX
- Project management: agile, waterfall, SCRUM
- Business management: executive, legal, technical

## Experience

- Owner, Manager at Glowing Mind, LLC from 2007 to present time,
- Owner, Technical Manager at Endospectrum, LLC from 2011 until 2016,
- Senior Technician at Western Reserve Medical, Inc. from 2005 until 2011,
- Junior Technician at Western Reserve Medical, Inc. from 2004 until 2005.

# Education

- Software development graduate at devCodeCamp, Milwaukee, Wisconsin.
- BS in Computer Science and Math at the State University, Kazan, Russia,
- HS at the State School 131 for Physics and Math, Kazan, Russia.

# Certificates

- Wisconsin Department of Health Services: Certified Nursing Aide (inactive),
- American Association of Snowboard Instructors: Level 1 Snowboard Instructor,
- Professional Ski Instructors of America: Level 1 Alpine Ski Instructor,
- United States Soccer Federation: Level F Soccer Coach.

# Projects

I led a team of developers to redesign the outdated website for the [UW-Madison Tactile Communication and Neurorehabilitation Laboratory \(TCNL\)](#) in 2009. The lab is known around the globe for its groundbreaking research in the field on brain plasticity and the work of its founder Paul Bach-y-Rita. Our team used the Drupal framework and LAMP stack for the development of the TCNL's web application. The project is deployed on UW's servers.

I have redesigned and built the web application for [Cleaning Bees, LLC](#) – a cleaning service company in Madison, WI. The company has marked its tenth year in business in 2017, and I was very happy to help the management team at Cleaning Bees tackle their everyday tasks more effectively than it was possible with their old website. I used JavaScript and the MEAN stack for the development of this project. The project is deployed on AWS.

I have participated in the [Phase 1](#) and [Phase 2](#) of the Startup Weeks project at devCodeCamp in June, 2017. I worked with four great developers to build an online marketplace platform for a sneaker-trade startup called The Milwaukee Swap. This was a great opportunity for me to learn a lot, demonstrate my current skills and get fully immersed in a highly intensive team work. Our team used PostgreSQL, Node, Express, and React for this project.
