I am a web designer and developer, and I have a lot of freelance experience building user interfaces for websites and web applications. I complemented my skill set in the summer of 2016, when I attended the Full-stack Software Development Program at devCodeCamp in Milwaukee, WI. I currently focus on building web applications using the latest JavaScript technologies such as MongoDB, Node.js, Express.js, and Angular, and I deploy my projects on Amazon Web Services. I am looking to join a strong professional team working on JavaScript development for modern web.

Education

1. Software development graduate at devCodeCamp, Milwaukee, Wisconsin
2. BS in Computer Science and Math at the State University, Kazan, Russia
3. HS at the State School 131 for Physics and Math, Kazan, Russia
